

Experts on the Field, Partners in the Game.

Sports Turf Managers Association Environmental laws and regulations inventory

Methodology

State and federal laws and regulations covering pesticide and fertilizer licensing/certification, pesticide and fertilizer use, school IPM, integrated pest management, and water use and quality were researched for their applicability to the management of sports.

The quality and availability of relevant state information varies greatly. Information on all topics is not available for all states because not all states have laws or regulations regarding each of the topic areas. Where possible, the information is linked directly from the state lawmaking authority. Some information is linked from information sources officially designated by the state or its agencies.

IPM for Municipalities, Commercial Establishments and Schools:

In municipal, commercial and campus settings, development of a written IPM plan to establish individual responsibilities, pest action thresholds, a system of communication and pesticide hierarchy is recommended and, in some cases, required by law. Presently, Boards of Education are required to develop written IPM plans for landscape applications at schools with grades K – 8.

Mississippi Pesticides in Schools

**In 2010 Senate Bill 2393 was passed amending MS Code Section 41-79-31 to require schools to implement an integrated pest management program that includes procedural guidelines for pesticide application, education of building occupants and inspection and monitoring of pesticide applications. The integrated pest management program may limit the frequency, duration and volume of pesticide application on school grounds. The MS Code Online has not yet been updated to include this information.
